## NuStar Energy L.P. Reconciliation of Non-GAAP Financial Information Related to the Quarter Ended September 30, 2015 (Unaudited, Thousands of Dollars, Except Unit and Per Unit Data)

NuStar Energy L.P. utilizes financial measures such as earnings before interest, taxes, depreciation and amortization (EBITDA), distributable cash flow (DCF), adjusted net income and adjusted net income per unit (collectively, financial measures), which are not defined in U.S. generally accepted accounting principles (GAAP). Management uses these financial measures because they are widely accepted financial indicators used by investors to compare partnership performance. In addition, management believes that these financial measures provide investors an enhanced perspective of the operating performance of the partnership's assets and/or the cash that the business is generating. None of these financial measures are presented as an alternative to net income or income from continuing operations. They should not be considered in isolation or as substitutes for a measure of performance prepared in accordance with GAAP. For purposes of segment reporting, we do not allocate general and administrative expenses to our reported operating segments because those expenses relate primarily to the overall management at the entity level. Therefore, EBITDA reflected in the segment reconciliations exclude any allocation of general and administrative expenses consistent with our policy for determining segmental operating income, the most directly comparable GAAP measure.

1. The following is a reconciliation of income from continuing operations to EBITDA from continuing operations and DCF from continuing operations:

(a) Other items consist of a net change in deferred revenue associated with throughput deficiency payments and construction reimbursements. For the nine months ended September 30, 2015, other items also include a \$56.3 million non-cash gain associated with the Linden terminal acquisition.

(b) DCF from continuing operations excludes the impact of unrealized mark-to-market gains and losses that arise from valuing certain derivative contracts, as well as the associated hedged inventory. The gain or loss associated with these contracts is realized in DCF from continuing operations when the contracts are settled.
